Explanation and Use of Department Special Provisions

00250S Prebid Conference

Use whenever a prebid meeting is required to discuss and explain project requirements and special features.

02721S Untreated Base Course (UTBC)

Use on all projects containing Untreated Base Course. Note: This Special Provision modifies the *Minimum Sampling and Testing* requirements as an experimental item while updating the *Minimum Sampling and Testing Requirements* Document and is a temporary fix until the document is completed. This Special Provision has been approved by the FHWA, AS IS. **Subsequent modifications cannot be made without approval by FHWA or Central Materials.** Failure to obtain approval could result in loss of federal participation.

02742S Project Specific Surfacing Requirements

Use when there is any type of asphalt paving in the project package.

02744S Stone Matrix Asphalt (SMA)

Use on all projects where Pavement Management Engineer or Region Materials Engineer dictates the use of Stone Matrix Asphalt (SMA) in the pavement section.

02765S Pavement Marking Paint

Use when pavement-marking paint is a bid item in the project package.

02783S Chip Seal Coat- Hot Applied

Material is a high-end chip seal. Use on high- traffic volume routes with heavy truck traffic. Verify use with the Region Materials Engineer.

02787S Bonded Wearing Course

Coordinate with the Region Materials Engineer on the use of this special.

02789 Asphalt Slurry Seal Coat

Use on all roadway projects that include the application of a Slurry Seal.

02924S Invasive Weed Control

Use when a project has the potential to introduce or spread invasive weed species. Contact the Region Landscape Architect for guidance.

03056S Self Consolidating Concrete (SCC)

Make available for use on all precast work items and specialty project items where SCC is needed. Verify use with Structures, Region Materials Engineer or UDOT's Concrete Engineer.
